PROFESSIONAL SUMMARY

Power Platform Developer with 3.4+ years of experience delivering 20+ automation solutions using Power Automate, Power Apps, Copilot Studio. Skilled in RPA, AI-powered workflows (Copilot Studio, Prompt Engineering, REST API), and technical lead delivery with strong client-facing and stakeholder collaboration. Proficient in documentation (PDD, TDD, SDD) and process optimization.

WORK EXPERIENCE

Software Engineer (Power Platform) – BOT Mantra

Feb 2024 – Present

- Created bots for loan liquidation, DRUL process and balance confirmation.
- Developed Power Automate flows for system integration, transaction validation, and automated approval routing.
- Built RPA workflows to perform data transformation, reconciliation, and variance analysis across large excel datasets.
- Built end to end automation solutions for clients across various domains such are Banking, Finance, Retail & Logistics.
- Architected a hybrid automation solution leveraging AI-driven Copilot Studio agent, Power Automate Flows and Power Automate desktop to bridge user input and automate various modules in SAP.
- Integrated Power Apps with backend systems using Power Automate flows to enable real-time synchronization and automated approvals.
- Implemented role-based access, master data management, and approval workflows using Power Apps and Power Automate.

RPA Developer– Raysoft InfoTech

Sept 2022 – Jan 2024

- Participated in requirements gathering and development of Power Automate Desktop bots.
- Supported initial deployment and integration efforts.
- Delivered multiple web automation tasks & automated desktop apps for internal business processes.
- Gained exposure to UiPath for Robotic Process Automation, Power Apps (Canvas) and low-code development initiatives.
- Provided Power Automate training to development teams.

PROJECTS

- **CSD – Balance Confirmation:** Automated financial balance confirmation workflows, including system login, multi-module navigation, data validation, and report generation.
- **GI System Upliftment:** Developed an enterprise-grade Power Apps solution to modernize and streamline Item Creation, PR/SO processing, GRN, and AP Booking (3-way & non-trade AP) across multiple geographies.
- **Ledger Reconciliation & Inventory Holding Analysis:** Developed RPA-driven reconciliation and reporting solutions using PAD to automate inventory holding analysis, supply-sales-stock reconciliation, and financial ledger (SOR) reconciliation, including data transformation, validation, and exception reporting.
- **Retail Order Planning & Sales Challan creation:** Created a multi-bot RPA solution to automate retailer demand processing, inventory validation, purchase order handling, and sales order creation and exception reporting.
- **Audit Classification Agent:** Built an AI-powered Copilot agent to assist auditors by classifying audit requests, identifying the required audit reports, and orchestrating downstream Power Automate Desktop (RPA) bots to automatically retrieve and download reports.

EDUCATION

- B.Sc. in Computer Science, ANJAC Arts & Science, Sivakasi, Tamil Nadu.
-

TECHNICAL SKILLS

- **Power Platform:** Power Apps (Canvas), Power Automate Desktop & Cloud, Copilot Studio.
- **RPA & Workflow Automation:** UiPath, Robotic Process Automation, Business Process Automation, Workflow Automation.
- **Data & Integration:** Dataverse, AI Builder, Custom Connectors, REST APIs, SQL, SharePoint.
- **Low-Code Development:** Low-Code Platforms, Microsoft Flow.
- **Delivery & Collaboration:** Client-Facing Experience, Problem-Solving, Communication Skills, Adaptability.
- **Languages:** HTML.

CERTIFICATIONS

- UiPath Academy Automation Developer Associate
